Proposed Development: *Industry – Extractive:* Proposed Youngs Road Quarry and ancillary activities

Summary of the proposed development

The proposed Youngs Road Quarry is a small-scale hard rock extraction with a maximum potential yield of 13,500 tonnes. The purpose of the quarry is to supply hard rock for local road maintenance and construction, with approximate demand of 7,000 tonnes/year. On this basis, the yield from the proposed quarry would provide approximately 2 years of demand for local needs.

Activities ancillary to the proposal include the temporary storage of bulk explosive material at Anson Point near the Norfolk Island Gun Club, to comply with segregated storage arrangements identified in Australian Standard 2187.1; and the storage of quarried material at land adjacent to and downslope from the Norfolk Island Airport Runway 11 and previously used for stockpiling of rock for the Airport runway upgrade.

The Minister declared the development 'significant development' under section 28C(5)(a) of the Act on 22 March 2019. As required under section 45(4) of the Act the development application is accompanied by an environmental impact statement prepared under section 45 of the Act.
